Professional Summary

Full Stack Python Developer with hands-on experience building scalable REST APIs, secure authentication systems, and high-performance backend services. Skilled in Python, Django, Django REST Framework (DRF), PostgreSQL, and ORM optimization. Strong background in database performance tuning, JWT-based authentication flows, and responsive React.js front-end development. Focused on delivering reliable features that improve load times, reduce failures, and strengthen user workflows.

Technical Skills

Backend: Python, Django, DRF, Celery, REST APIs, JWT Authentication, ORM, MVT Architecture

Frontend: React.js, Redux, JavaScript (ES6+), Tailwind CSS, Bootstrap, Responsive UI, Axios, DOM Manipulation

Database: PostgreSQL, SQLite, Query Optimization, Indexing, Joins, Views, Transactions

Cloud Hosting: AWS, Vercel, Railway, Netlify

Tools DevOps: Git, GitHub, CI/CD, Postman, VS Code, PyCharm, DBeaver

Methodologies: Agile, Scrum, SDLC, RESTful Architecture, TDD, Clean Code

Professional Experience

Python Full Stack Developer | Bridgeon Solutions LLP, Kozhikode

2025 – Present

- Orchestrated 15+ REST APIs using **Django & DRF** covering authentication, product management, and order processing, cutting service response time by **25%**.
- Crafted 12+ responsive UI modules using React.js and Redux, bringing down UI-related bug reports by **30%**.
- Fortified a secure multi-role authentication workflow using **Django Simple JWT**, ensuring reliable access control for **1,000+ users**.
- Accelerated system performance by refining **Django ORM queries** and PostgreSQL indexing, bringing heavy query execution from **1.5s to under 600ms**.
- Standardized API documentation for 40+ API endpoints via Swagger, reducing frontend integration errors by **40%**.
- Collaborated actively in Agile sprints, improving feature delivery speed and reducing rework cycles by **15%**.

Projects

Small Business Data Insights Agent

- Spearheaded an AI-powered analytics platform using **FastAPI and React 19**, enabling non-technical users to query datasets via natural language and reducing manual analysis time by **90%**.
- Fabricated a high-performance data processing pipeline using **Pandas**, converting raw CSV uploads of **10,000+ rows** into interactive **Recharts visualizations** in under 2 seconds.
- Embedded **LLM (AI)** capabilities to facilitate a "Chat-with-Data" feature, providing context-aware business insights with **95% accuracy**.
- Automated the reporting engine using **Jinja2 and xhtml2pdf**, allowing users to generate and export comprehensive PDF reports instantly.

Echobay – Full Stack E-Commerce Platform

- Architected a decoupled application using **Django REST Framework (DRF)** and React.js, hosted on **AWS EC2** with Nginx and Gunicorn to handle **500+ daily requests**.
- Established a robust **CI/CD pipeline** via Vercel for the frontend, automating build processes and cutting deployment time by **40%**.
- Unified secure authentication combining **Google OAuth 2.0** and JWT, ensuring seamless user access and stateless session management.
- Optimized **Nginx Reverse Proxy** and Vercel redirects to handle CORS and secure API routing, ensuring **99.9% uptime** between client and server.

Course Selling Platform – Backend API

- Formulated a scalable LMS backend using **Django REST Framework & PostgreSQL**, supporting **500+ concurrent users** and managing **50GB+** of video content.
- Enforced robust **Role-Based Access Control (RBAC)** via JWT, ensuring granular permission levels for 3 distinct user roles (Admins, Instructors, Students).
- Secured the video delivery system using **Signed URLs**, preventing unauthorized access and protecting **100%** of premium content revenue.
- Engineered advanced filtering and pagination logic using **Django Filter**, reducing API response payload size by **50%** for large datasets.

Education

Higher Secondary Education (Commerce)

2023 – 2025

Nochad Higher Secondary School, Calicut

Languages

Proficient: Malayalam, English, Hindi
